## Memory game: Wild animals – with focus on vocabulary and buildup of sentences

- Play the memory game with your child
- Look at the pictures together
- Talk about it while looking at the pictures
- Try together to find the animals on the poster
- You can play this game when your child is around 2 years old. Begin with 2-3 sets of pictures at a time. Say the words out loud and describe what you can see at the picture. For instance: the lion is sleeping.
- When you play the memory game, your child will learn new words and will build sentences –and also to wait for your turn to play the game.
